## Recommended Care and Maintenance of Pro Sports Shoulder Pads

### After Each Game or Practice

---

Remember to check your Pro Sports shoulder pad for any tears or cracks after each practice or game. If you spot any damage, promptly send it to Pro Sports for repair or replacement.

### Monthly

---

We suggest a regular cleaning schedule for your Pro Sports Air Management cushions. Use a soft detergent and disinfectant, wipe it off, and then let air dry. Do not immerse in water or use a washing machine or dryer.

### Yearly

---

At the end of each season, your Pro Sports shoulder pad should be sent back to Pro Sports for reconditioning. During the reconditioning process, we inspect the plastic for cracks or weak points, we inspect the cushions for tears as well as clean and sanitize each cushion, and all other parts and hardware are inspected. After inspection, your Pro Sports representative will reach out if any replacement parts or pads are needed.

### End of Product Life

---

As with any high impact product, regular maintenance and reconditioning of Pro Sports shoulder pads are key to their durability. With proper maintenance and yearly reconditioning a Pro Sports shoulder pad should maintain its protection rating for a period of 10 years. Pro Sports will not recondition a pad older than 10 years and it is recommended they be discarded and replaced. In the event that we determine a shoulder pad is unable to be reconditioned, a Pro Sports representative will reach out to you quickly to determine next steps.

When in doubt, please reach out; a Pro Sports Pads representative would be happy to answer any questions you may have. Give us a call at 866-883-6265.
